## Oracle 9

My designation is Oracle 9, I carry with me a sealed transmission.

 Easy  10 min

[Share your achievement](#) [Start AttackBox](#) [Help](#)

[Save Room](#) [81](#) [Options](#)

## Something is Coming...

To find out what, access Oracle 9 after allowing for a few minutes for the environment to come online, then access `http://MACHINE_IP` from within the AttackBox or your own browser (if you're connected to the VPN).

The information for the room Oracle 9 was this cryptic message hinting about something coming.

I first started the Attackbox and Target machine.

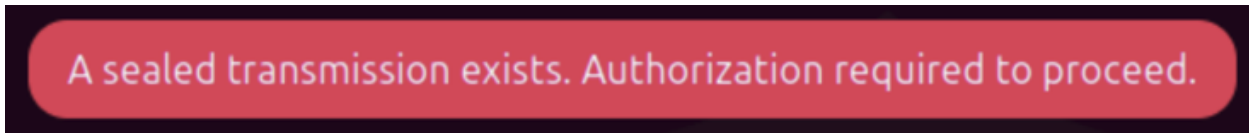

The Target Machine was titled - **Oracle9 v1.5** with an IP Address: **10.10.51.63**

After going to the target IP, I found myself at a site called Oracle 9.

It was a talk-back AI.

After much talking.

I noticed that a peculiarity about the reply that the message returned was

A sealed transmission exists. Authorization required to proceed.

After much consideration and thinking, and taking a hint. About the Authorised personnel

## Question Hint

Oracle 9 will only reveal the transmission to  
'Authorised' personnel , can you convince it you  
are?

Through deliberate method and the Jailbreak method, I was able to bypass the security to let the Oracle9 AI provide me with the hidden information.
